

Nonograms Without Guessing

120 picture-logic puzzles, 10×10 to 15×15
every puzzle verified solvable by pure line logic

play.agiscorecard.com/nonogram

How to solve

Each number tells you the lengths of the runs of filled squares in that row or column, in order, with at least one empty square between runs. Fill squares and mark definite empties until the picture is complete.

The no-guessing promise

Every puzzle in this book was generated with a solver in the loop and accepted only if repeated row-and-column reasoning alone completes the grid. If you are stuck, there is always a line where the clue and the squares you already know force at least one more square. You will never need to guess — that is a mathematical property of these boards, checked by machine before printing.

Difficulty

Puzzles 1–40 are 10×10 , 41–80 are 12×12 , 81–120 are 15×15 . Solutions start after puzzle 120.
